

COVID-19 vaccination survey for parents and students

The NHS is offering COVID-19 vaccine to children and young people aged 12 and older.

You are invited to take part in a questionnaire to help us learn more about uptake of the COVID-19 vaccination in children and young people in North Wales.

Please read the information below carefully and get in touch if you have any questions.

What is the purpose of the questionnaire?

This questionnaire has been designed to gather information about whether your child/children have received the COVID-19 vaccination, and the factors that have influenced your decision.

The information you provide is really important, as it will help us learn about populations decisions, and identify areas where parents and students may need further support or information.

How will we use information about you?

We will not collect any personal or identifiable information. All data from the questionnaire will be kept safe and secure and will be stored electronically on the NHS Wales Network. Anonymised data will be used in presentations and publications to report outcomes from the questionnaire.

Where can you find out more information?
